3D Systems Makes The Runway At Melbourne Fashion Week

- Collaboration Delivers Innovative, 3D Custom Couture -

Rock Hill, South Carolina – November 14, 2011 - [3D Systems](#) Corporation (NYSE: DDD) announced today that it collaborated with designers Amelia Agosta and Natasha Fagg, on a successful runway event which featured a one-of-a-kind 3D printed “brassiere” during Melbourne Spring Fashion Week.

3D printing was invented by 3D Systems 25 years ago, transforming the way designers and engineers create with complete freedom from traditional constraints. Today, 3D printing is used by leading fashion, jewelry and lighting designers pushing the envelope on creativity, functionality and utility the world over.

“[3D Systems Asia-Pacific](#) is a leading 3D printer and custom parts provider serving a wide variety of applications and industries. Empowering a talented designer like Amelia to achieve her creative dreams underscores the value of our 3D content-to-print solutions,” said Simon Marriott, General Manager, 3D Systems Asia-Pacific.

About 3D Systems Corporation

3D Systems is a leading provider of 3D content-to-print solutions including 3D printers, print materials and on-demand custom parts services for professionals and consumers alike. The company also provides creative content development, design productivity tools and curation services and downloads. Its expertly integrated solutions replace, displace and complement traditional methods and reduce the time and cost of

designing new products by printing real parts directly from digital input. These solutions are used to rapidly design, communicate, prototype and produce functional parts, empowering its customers to create with confidence.
