3D Systems Brings Its Latest 3D Design-To-Manufacturing Products to China's DMP 2013

- Company expands its presence and commitment to China

ROCK HILL, South Carolina –November 15, 2013 – [3D Systems](#) (NYSE:DDD)

today announced that it is bringing its consumer and professional 3D printing products and services to China's [DMP 2013](#) being held November 13-16, 2013 in Dongguan, Guangdong Province, China. Focusing on the hybridization of traditional and advanced manufacturing technologies, the event is expected to host some 80,000 visitors and spotlight 3D printing as part of China's strategic growth initiatives. 3D Systems is located in Hall 3, Stand 3C607.

3D Systems is exhibiting its latest [consumer](#) and [professional 3D printers](#), direct [scan-to-design and inspection tools](#), and its powerful [Quickparts](#)[®] services providing global quick-turn cloud-printing access to over 100 materials from the latest advanced manufacturing technologies for all your design to manufacturing needs. Attendees are invited to experience hands-on demonstrations of the award winning [Cube](#)[®] and [CubeX](#)[™] 3D printers, and experience the ease of creating in 3D through [Cubify](#)[®], 3D Systems' consumer platform.

"China, with its rapidly growing middle class and established manufacturing base, is a significant growth opportunity for us particularly with its increased interest in 3D printing," commented Cathy Lewis, Chief Marketing Officer, 3D Systems. "With strong focus this year on 3D printing as a manufacturing platform for China, DMP 2013 provides an excellent venue to engage attendees and demonstrate how 3D Systems provides the products, tools and solutions for manufacturing the future in China."

DMP2013 continues until November 16, 2013. More information is available at: <http://www.dmpshow.com/lang-en/info.html>.

###

About 3D Systems Corporation

3D Systems is a leading provider of 3D content-to-print solutions including 3D printers, print materials and on-demand custom parts services for professionals and consumers alike with materials ranging from thermoplastics, metals, ceramics and edible sugar. The company also provides software design tools including CAD, scanning and inspection and consumer 3D printers, apps and services. Its expertly integrated solutions replace and complement traditional methods and reduce the time and cost of designing new products by printing real parts directly from digital input. These solutions are used to rapidly design, create, communicate, prototype or produce real parts, empowering customers to manufacture the future.
