

# 3D Systems' End-to-End Workflow

**Powerful design tools in an intuitive interface help deliver your concept downstream.**

## **DIGITIZE**

Design up to 80% faster with reverse engineering

## **DESIGN**

Create custom and complex geometries with 3D design

## **SIMULATE**

Identify and address areas for improvement

## **MANUFACTURE**

Gain access to full service manufacturing using additive and subtractive technologies

## **INSPECT**

Ensure results match expectations with non-destructive metrology and inspection

## **MANAGE**

Maintain visibility into print job status, material levels, preventative maintenance opportunities and more
