

3D Systems Leuven is looking for a motivated

BUSINESS PROCESS ENGINEER (M/F)

About 3D Systems Leuven

3D Systems Leuven, formerly LayerWise, is a dynamic and leading enterprise, specialized in 3D Printing of metal components. 3D Systems Leuven is not only a technology developer but also a technology user. This makes us a strong innovation partner for clients in the industrial, medical and dental sector.

With this technology, we build up material in layers using a high intensity laser until it becomes a solid product. Unlike conventional production techniques, this one does not render any material loss, nor does it require any tooling. It does however, enable the designers to manufacture very complex geometries which are not producible using the traditional techniques.

JOB DESCRIPTION

As a team member of the Global Supply Chain organization, the Business Process Engineer will be responsible to characterize, stabilize and optimize the business process across operations, to be leveraged over Logistics, Procurement and Contract Manufacturers.

RESPONSIBILITIES

- Evaluate current business processes and identify risks
- Define process requirements, establish a plan for implementation, execute and monitor adherence
- Train and motivate teams to use the tools and become leaner and to support data driven decisions
- Develop and maintain best practices to meet changing business needs
- Benchmark and set up initiatives for continuous business process improvements
- Ensure optimized use of existing tools (e.g. Oracle R12), develop new tools and go for max. automation
- Global alignment within colleagues of Supply Chain in Rock Hill

PROFILE

- Master in Engineering or Supply Chain or Operations or General Business or relevant experience
- Advanced experience with MS Office is required; experience working with Oracle R12 or willing to learn in very short term
- At least 10 years relevant working experience
- Mature personality, proven track to lead change management and acting as a partner on strategic communication.
- Certified or practice with Lean Six Sigma methodology
- Pragmatic approach: processes should support the business and not vice versa
- Strong verbal and formal communication skills, assertive to build network with internal stakeholders
- Fluent in English

WE OFFER

- A challenging job in a young and dynamic team
- A competitive salary and additional non-statutory benefits
- Career opportunities in a global company with exponential growth.
